

NOTECH QUALITY POLICY

Notech AS has as main objective to deliver services and high quality products to its customers and to meet requirements for adaptation and competitiveness.

This involves having a strong focus on all phases of sales, planning, procurement, prefabrication and assembly, as well as control of products and services

By actively follow up quality improvements through the system's management processes, it will cause all employees to perform their work right the first time and at the agreed time.

Notech should have a high focus on:

- a living quality system developed in line with business needs
- satisfied customers making repurchase the services and products
- to comply with the relevant laws and regulations
- continuous improvement of work processes in relation to client needs
- satisfied and motivated employees
- that employees have the relevant expertise and further development of this

Corporate quality policy is distributed to all employees and is part of the information material given to new employees.

Notech quality policy is posted at key locations in the company in addition to being located on disposable corporate websites.
